

Our 2-Day Guarantee

We hate waiting for results. You shouldn't have to wait either.

We are so confident in our ability to solve your reporting problems that we guarantee our results. Give us two days to start working on your reporting challenge - if you don't see your reporting beginning to improve, then you don't pay. If you like what you see, you pay for the time and we continue with the engagement.

We know it's unlikely that we can solve ALL your reporting problems in two days – if it were that simple you would've figured it out already. But in two days we can give you an idea of what we are able to do to solve your reporting woes and get you the reports you need without purchasing expensive new software.

And yes, we successfully run long-term projects like worldwide financial consolidations. But almost all of our clients began with a small taste of our work and kept coming back to us for larger projects.

More importantly, our goal is always to make you independent. We will teach you as much as you want to learn so we can keep your costs down and our value up.

We specialize in complex accounting and databases, and we are experts with most commonly used ERP systems like Oracle, Lawson and AS400.

Here's what some of our clients have to say about us:

“Red Three has saved our company time and money by making it easier to get the data we need quickly and easily.” - Roseann Tiseo, HRIS Manager, NBTY

“The results of our financial consolidation project dramatically reduced the effort required for both monthly and year-end reporting and auditing while providing management with a ‘single version of the truth’ reporting data . . . I’m not the type of guy to keep a consultant if the relationship isn’t working out. My business relationship with Adam is ongoing over 12 years. Red Three gets the job done.” - Nick Costa, Senior VP & CFO, D.F. King

“Red Three explained how to use the functionality that already existed in our system. A simple fix resulted in eliminating the tedious hours spent reconciling reports and it gave management confidence in their numbers. We now create reports at the push of a button.” - Howard Gerner, Assistant Controller, Jewish Board of Family and Children’s Services

“Red Three delivered what we needed faster than we expected and under budget. I’m not a fan of consultants as they’re motivated to come in and stay as long as possible. Red Three flips this scenario by getting the job done.” - Dan McDonald, Director of Financial Services, NBTY

The reports you need from the software you already have™
